Meteorological Situation

High pressure is over southern England and ridging over the North Sea creating relatively calm conditions. A warm front is passing over northwestern Scotland and is expected to pass into the northern North Sea later today. The high pressure system over the UK is expected to gradually move eastwards through the next few days which will block the progress of any Lows over the Atlantic.

Summary next 72 hrs: Wind: WSW-ly, backing to SE, moderate, increasing to fresh breeze. Visibility: moderate/poor to moderate for periods. Sea temperature: 9-10C.
