Meteorological Situation

Low pressure near Faeroes is moving towards southern Norway in the coming 24 hours. While passing north of the Shetlands winds will gradually veer while showers and remnants of frontal zones make weather conditions unsettled in general. In the wake of the low high pressure will gradually build from the west, causing a northerly flow over the Orkneys on Sunday and as the high gains influence weather conditions will gradually settle. After the weekend a new depression is forecast to approach Europe from the Atlantic. The center is expected to pass just north of Scotland in the course of Wednesday. Local conditions next 72 hrs: Wind: WSW-ly, veering to NNW, fresh breeze. Sea temperature: 10-11C.

Warnings (next 24 Hours)

Gale ● Nil
Wind Shear ● Nil
Lightning Risk ● Low
Confidence ● Low
