## Meteorological Situation

High pressure near Iceland has a ridge to the southeast over the Orkneys towards the Netherlands which is slowly shifting eastward. Meanwhile an Atlantic depression is heading northeast in the direction of the Faeroe Islands and Iceland, but does not move fast. As it approaches southeasterly winds are forecast to increase while associated frontal systems make weather conditions unsettled. After passage of the first frontal trough winds will veer to more south to southwesterly direction. The low will remain near Iceland from Wednesday till well into the coming weekend, causing southwesterly winds and unsettled conditions to be continued. Local conditions next 72 hrs: Wind: NNE-ly, veering to SE, light, increasing to moderate/fresh on 16 June 12 UTC. Sea temperature: 11-12C.

### Warnings (next 24 Hours)

Gale  
● Nil

Wind Shear  
● Nil

Lightning Risk  
● Low

Confidence  
● Low

### Criteria Levels

Winds 10m Spd  
35 kts
