Meteorological Situation

Low pressure near Iceland is moving northeast towards the Norwegian Sea. Its associated frontal system is over Scotland and brings cloudy/rainy weather conditions to the Orkneys. A new depression is forecast to pass just southeast of Iceland tomorrow, causing winds to increase and prolonging the grey weather type. In the course of the day improvement is to be expected although an occasional shower cannot be ruled out and winds will stay firm. Tuesday and Wednesday are also expected to see some showers. According to the weather maps Thursday looks to be the best day of the week when a ridge of high pressure passes over. Local conditions next 72 hrs: Wind: SW-ly, moderate, increasing to strong breeze on 5 October 12 UTC (risk of near gale), and abating to light on 6 October. Sea temperature: 13-14C.
