Single Location Forecast - 7 Day

Scapa Flow (58°53'N 003°02'W)
Scapa Flow
Orkney Harbour DTNO_REF_19049545

Issued on 04 November 2026, 04:01 UTC

Meteorological Situation

The centre (1039hPa) of a very large high pressure area is located over Scotland and the adjacent North Sea. Low pressure is far away over the western Atlantic. Today and in the next day's mainly fair weather is forecasted for Scapa Flow. There is a mix from sunshine and clouds. Very occasionally louds could become thick enough to produce some drizzle or light rain. Winds are light, force 2 or 3. The centre of the high is expected to gradually more towards Scandinavia, but influence is expected to remain over the UK and the North Sea until at least Sunday. By then a weak low (1019hPa) is expected over Scotland. A change in the calm weather can be expected on Tuesday 10 November due to approaching low pressure from the south. Winds increase then on Wednesday 11 November to fresh. Local conditions next 72 hrs: Wind: SSW-ly, backing to ESE, light. Sea temperature: 11-12C.
