Meteorological Situation

High pressure, with its centre (1038 hPa) over the Orkney and Shetland Islands, will remain in place today. During the weekend, this high-pressure system will shift southeastward across southern Scandinavia towards eastern Europe. However, an associated shallow ridge will remain established towards the Orkney Islands. Meanwhile, a small low-pressure system will develop over the North Sea, but it is expected to have little impact on your region. Due to the weak pressure gradient, calm conditions will prevail over the Orkney Islands. After the weekend, as the low-pressure system dissipates, high pressure is expected to build over the UK again. Local conditions next 72 hrs: Wind: ESE-ly, light. Sea temperature: 11-12C.
