Meteorological Situation

A low (984hPa) over the western Atlantic, and a low (987hPa) northwest of the Azores, and a low (987hPa) over southern Scandinavia are all connected and have formed a large complex low. Meanwhile high pressure is located southwest of Iceland and has a ridge via Ireland into England. The weather over Scapa Flow is unsettled today with showers and hail. The northerly winds are strong. Overnight winds are expected to decrease on the approach of high pressure from the Greenland Sea. When the centre moves to England, winds become west and increase again to fresh to strong. Showers are expected to continue until Saturday afternoon when rain is expected. The next days after are expected to remain unsettled under low pressure influence and especially on Tuesday it can become very windy. Local conditions next 72 hrs: Wind: NNW-ly, backing to W, strong (risk of near gale), abating to light on 14 November, whilst veering again. Sea temperature: 11-12C.

Warnings (next 24 Hours)
