Meteorological Situation

A complex Low deepens over the Norwegian sea, extending the SW off the coast of Ireland while High pressure pushes in over the southern North Sea towards central Europe. A fresh to strong SW-ly flow veers to a fresh to strong N/NE-ly flow Sunday as a front crosses Orkney. Winds easing through the day, veering to a NW-ly flow by Monday as when they increase again the southern cores deepen as they track up the Norwegian coast, while a brief transient ridge pushes in from the west. Tuesday another deep low approaches from the Atlantic sending a deep trough over the UK towards the Netherlands. Local conditions next 72 hrs: Wind: variable direction, fresh breeze (risk of strong breeze). Sea temperature: 10-11C.

Warnings (next 24 Hours)
