Meteorological Situation

A low pressure trough passes through the North Sea today, trailed by a weak ridge of high pressure; strong winds blow N/NW-ly through this evening and tomorrow. A brief spell of settled conditions is expected as the ridge passes over late on Monday and into Tuesday morning before deep and complex low pressure makes its approach from the Atlantic. An active front passes through on Tuesday and high winds are forecast briefly as the gradient tightens, then core splits off from the system and travels across Southern England. Slack gradients and showers are expected later in the week. Confidence is good to Tuesday and low from Wednesday onwards. Local conditions next 72 hrs: Wind: N-ly, veering to E, light, increasing to moderate. Sea temperature: 10-11C.
