Meteorological Situation

Deep low pressure over the North Atlantic together with a ridge cast by high pressure to the north maintains windy conditions. The coming days, as the low pressure area tracks away to the south and weakens, the ridge dominates further. This results in slightly calmier conditions until well into the weekend with mainly partly cloudy sky. Local conditions next 72 hrs: Wind: ENE-ly, backing to NNE, light (possible fresh breeze). Sea temperature: 10-11C.
